

Week 2 Day 2: Assessment

Problem Statement: Create an Angular application using Angular CLI called "ABC Automobiles"

1. Create a component named "NavigationComponent" as a function, which includes navigation links such as Home, About Us, Vehicles, Services, and Contact Us.
2. Create a component named "AboutComponent" as a class, which displays a banner image for the website along with some "About Us" content using card classes.
3. Create a component named "FooterComponent" as a function, which displays a simple copyright text.
4. All the components & data displayed should be responsive
